What's New In Easy Burning?

Easy Burning is a useful CD or DVD burning tool that enables you to burn CDs and DVDs in a quick, convenient manner. It can be easily installed, comes with a simple interface and provides you with several additional functions. Do you ever insert a disc into your computer and find yourself perplexed as to what to do next? You may have hit a string of poor discs; no doubt that one of them is mysteriously stuck, or maybe you've opened a disc that contained some bad files. Easy Burning, a new CD or DVD burning tool from Softasm, is the perfect help in situations like these. Easy Burning is an impressive CD or DVD burning tool that makes CD and DVD-burning easy and convenient by offering numerous options. When you use the program, you simply select the information to burn and then click the Write button. Easy Burning then does everything else for you, ensuring that your disc is ready to use. The image below shows a preview of Easy Burning. This is a complete program that you install on a computer and then use to burn CD and DVD discs; it is a standalone application that does not require any external programs or libraries to run. If you don't have a working optical drive on your computer, you need to install another program. Softasm works hard to offer you only high-quality programs, which means that it takes great pride in offering Easy Burning for you to use. Removing any problems after the burn There are cases when you try to burn a disc and many issues pop up, or even some of the files end up being damaged; this is where Easy Burning can help. If any problems arise after burning, you can use the program's Restore function to get a clean version of the disc. The size of the program is only 44 KB and this is an extremely small program; it does not require any libraries or other software to work. This means that it can be used right out of the box and you can get to work after installing it on your system. The next step is to set up and configure it. Working with Easy Burning Before you can use the program, you will have to set it up. You can do so by going to the program's main window and going to the settings icon that says Configure. From there, click the settings button. Alternatively, you can click the Configure button. In both cases, you will be taken to the settings window, as
