Complete the story and gain your long-awaited titles to become an Elden Lord in this fantasy action role-playing game. TESTIMONIALS "When I first played Rise of Tarnished, I was really surprised and was intrigued by the neat 3D world." "It was pretty fun to watch battles and then when my character died, it felt really sad and depressing. It was just an amazing experience." "Farming and exploring were one of my favorite parts of the game. I would often go out early in the morning and just walk around and look at the beauty of the world. There were so many things to see and do. I would never have expected such a beautiful world to be hidden in such a massive game. I'm sure there's a lot of great things to discover in this game." "Rise of Tarnished is different in so many aspects. It has massive dungeons that are full of 2D graphics and large 3D dungeons. There's also a world map that feels so real, and I'm very excited to explore it." "The music in this game is beautiful and I think that music is very important to the game. Everyone will have their own favorites, but I personally really liked the song 'Free Spirit' which plays on the intro screen. It's very romantic and catches the mood of the game right." "It's fun to use strategy to defeat enemies and grow your own army. I really like that the characters and the enemies all have their own individual personalities, and that you have to think carefully about which path you should take to succeed. It just felt like a very epic and fun game." "The game has fantastic bosses and the music is very lively

\*\*\*Story\*\*\* The good life is full of risks. There are no guarantees, and the loss of life is inevitable. You must have the courage to live and overcome your fears to be rewarded with the best life that exists. That is the way of the Elden Ring. A hundred years have passed since the last [Great War]. In this time of peace, the power of magic has grown, and the world of Solandel has become an Elden Ring encompassing countless realms. Magic is no longer kept in secret, and people can freely wield the power of the Elden Ring. However, the history is not over yet. A century of peace is not eternal. The Centaur Guard, a secret organization, fights against the Elden Ring. They search for a legendary weapon, the Omnium, which once belonged to a god. With this weapon, they plan to open a hole to another world where their god is ruling and recreate the current time. Through the work of the Centaur Guard, they have managed to retrieve the Omnium, but in the process, it broke into a hundred pieces, and the only piece left is the Emerald Ring. As the fate of the entire world is tied to this Emerald Ring, the Centaur Guard attempts to hide the pieces of the broken Omnium. Many lords of the Elden Ring have begun a conflict, and now a civil war is starting. As an Elden Lord who holds the power of the Emerald Ring, you will be given an important role in this epic drama. Along with the heroes of the Elden Ring, you will fight against the Centaur Guard to save the true king of Elden, and the fate of the world. I understand that this is pretty much the usual fantasy RPG elements, but its colourful and simplistic design is easily enjoyable, even if its story seems a little weak. It makes no attempt at being intimidating, and its normal save/load issues don't prevent you from spending the vast majority of your time fighting and talking to people, which is great, as the dialogue is pretty amusing. There are two RPG

**Modulation of the leukemia inhibitory factor signal during re-**

**stimulation of lymphocytes. Leukemia inhibitory factor (LIF) is one of the pleiotropic cytokines and can regulate the survival of hematopoietic cells. We examined the effect of LIF on the interleukin-2 (IL-2) signal in lymphocytes. LIF acts only on retinoic acid receptor beta (RARbeta) expressed on the lymphocytes. We found that LIF increased the IL-2-induced activation of NFkappaB. The LIF-induced increase was concentration-dependent. LIF increased the activation of MAPKs p44/42 and p38, but not of JNK MAPKs. When either the NFkappaB or MAPK signaling pathways was blocked, LIF failed to activate IL-2-induced NFkappaB activity. LIF increased IL-2-induced NFkappaB activity to the same level as that of the 12-O-tetradecanoylphorbol-13-acetate (TPA)-induced NFkappaB activity, whereas LIF had no stimulatory effect on the TPA-induced NFkappaB-related cell survival. Anti-sense LIF abolished the effect of LIF on IL-2-induced NFkappaB activity. These results suggest that LIF modulates the IL-2 signal by the RARbeta**
